

This Crossover symbol represents TRS products that have been identified and used by consumers for other purposes. In some cases these uses are vocationally oriented. TRS is identifying these products for information and educational purposes only. *

Device	Action	TRS Primary Design Use	Crossover Use
<p>Criterion Series</p>	<p>Grasps handles with small to medium diameter Pivot allows steering, improved control</p>	<p>Biking (Road & Flat Land)</p>	<p>Pushing/pulling Sweeping/raking Steering</p>
<p>Dragon</p>	<p>Can secure manage poled style handles through the 'donut hole' Loosely interfaces with objects Allows freedom of movement</p>	<p>Martial Arts</p>	<p>Home management tasks Property management Climbing Steering</p>
<p>Helix</p>	<p>Molded, high performance, polyurethane, "DNA" helical shape replicates holding action of the hand in the control of short or long cylindrical handles grips. Unique strength and flexibility "feels" like the hand and forearm with "reflexive", energy capture, storage and release action.</p>	<p>TRUE Cross-Over multi-purpose Vocational-Avocational prosthetic device. Especially useful in any activity specific task that uses long handles or "sticks" like lacrosse, hockey (Ice, street and field), raking, shoveling, garden tools. Also for smaller garden tools, water hose control. Many undiscovered "uses".</p>	<p>TRUE Cross-Over multi-purpose Vocational-Avocational prosthetic device. Especially useful in any activity specific task that uses long handles or "sticks" like lacrosse, hockey (Ice, street and field), raking, shoveling, garden tools. Also for smaller garden tools, water hose control. Many undiscovered "uses".</p>
<p>ISHI & F-ISHI</p>	<p>Adjustable grasp Secure, stable with strap</p>	<p>Archery Fishing</p>	<p>Grooming Holding handled objects</p>
<p>Multi-D</p>	<p>Adjustable grasp Secure, stable with strap Larger More robust</p>	<p>Multi Purpose</p>	<p>Home Management Yard Work Holding larger handled objects Fishing (Salt Water)</p>
<p>Swinger</p>	<p>Loosely interfaces with objects Allows freedom of movement</p>	<p>Gymnastics</p>	<p>Carrying Climbing Steering Fishing</p>
<p>Raptor</p>	<p>High strength, "large #7" shaped titanium lifting and supporting terminal device with replaceable, protective tip for cushion and non-marring applications and greater friction control over surfaces. Unique pivot action increases versatility in lifting, supporting, climbing, etc.</p>	<p>Indoor and outdoor rock and gym climbing.</p>	<p>Heavy duty lifting and transport and loading tasks. Handling Lifting veneer woods, panels or similar</p>
