

Power Play Hockey

Product Code: POWER PLAY

Features:

- The **Power Play** is a high performance prosthetic device for playing ice hockey. The **Power Play** is designed to securely, slide-fit down over the last five inches of the hockey stick for "top of the stick" handling control.
- The safe, all polymer construction is available in two stiffness models.
- **85** standard, most popular. **95** special order, special applications.
- The **Power Play** provides for quick, agile stick and puck control and powerful shots. The energy storing design performs much like the human forearm and wrist. The **Power Play** flexes and rebounds for shots and will bend away under load to prevent injury

during a fall or while being "checked into" the boards.

- The **Power Play** can easily be modified to provide the exact level of flexibility and power that the individual player demands making it extremely versatile.

"L" Code: L6704

SPECIFICATIONS

Overall length:	9 in. (23 cm.)
Effective length:	4 in. (10 cm.) Length it adds to prosthesis before stick attachment.
Weight:	11.5 oz. (326 gm.)
